RE: Approval of Land Use Control Plans
SMA 4 - Former Chemical Plant
SMA 5 - Former Pig Iron Foundry
EPA ID Number: ALD 000 828 848
RCRA Docket Number: RCRA-04-2016-4250

Dear Mr. Wiggins:

The United States Environmental Protection Agency (EPA) has completed its review of the October 29, 2020, Land Use Control Plans (LUCP) for the above noted Solid Waste Management Unit (SWMU) Management Areas (SMAs).

The review found the LUCPs acceptable as the initiating documents to establish facility controls as envisioned by the selected remedy. Although every effort was made to anticipate all needed aspects to the LUCPs, since these are the first LUCPs at the facility, it is possible that further components could be identified or become evident during implementation. If any additional components are identified, then updates/modifications to the LUCPs can be dealt with later.

If you have any questions, please contact me at (404) 562-9629 or at hardegree.wes@epa.gov.

Sincerely,

Corrective Action Specialist
RCRA Programs and Cleanup Branch
Land, Chemicals and Redevelopment Division
